

A Brief Explanation . . .

This set of calendars is known officially as the Gregorian Calendar. It was worked out by Pope Gregory XIII in 1582 to correct the errors in the Julian Calendar. The Gregorian Calendar was adopted almost immediately by most of the European countries. Great Britain did not adopt this calendar until 1753. We have used the beginning date of 1776 which is the year our country declared its Independence.

Understanding the Gregorian Calendar can be simplified by remembering your elementary school verse, "30 days hath September, April, June, and November. All the rest have 31, excepting February alone, which hath but 28, in fine, till leap year gives it 29." LEAP YEAR occurs every 4 years and on century years that can be divided by 400. Leap year is omitted on century years that CANNOT be divided by 400.

You will note that there are 14 calendars, 7 for regular years and 7 for leap years. Each set of yearly calendars rotate the first day of each year from Sunday thru Saturday. The sequence is too complicated for a concise formula to be enumerated here. For easy and quick reference, use the index for the year you want to use. For further reference and an easy guide, the year applicable to each calendar is listed at the top.

This set of calendars will make a valuable reference for home and office. Keep it handy as TIME is the most important thing in your life.

S. DURWARD HOAG

INDEX TO YEARS

The Numbers opposite year indicates
the Calendar Number.

1776—9	1827—2	1878—3	1929—3	1980—10
