

Division of General Obstetrics and Gynecology

Department of Obstetrics and Gynecology

University of Iowa Hospitals and Clinics

Rachel Maassen, MD

Director Division of General Obstetrics and Gynecology

The Division of General Obstetrics and Gynecology provides well-woman care for women of all ages and complete care for pregnancy and birth. We also evaluate and treat gynecologic disorders. We perform office, outpatient and inpatient gynecologic surgery. We offer minimally invasive hysterectomy

including total laparoscopic and robotic surgery. Our division is comprised of fourteen obstetrician-gynecologists, five certified nurse midwives, and four advanced nurse practitioners. We are all dedicated to outstanding clinical practice and teaching.

Our division is committed to excellence in caring for women from adolescence to maturity. We regard each patient as an individual with her own history and needs. Some areas of special expertise are highlighted.

Colposcopy and Laser/LEEP offers diagnosis and treatment for women with abnormal Pap smears in accord with the latest national guidelines

Complex Contraception provides family planning expertise to women whose contraceptive choices are affected by coexisting medical problems

Fibroids a multidisciplinary clinic with interventional radiology offers complete consultation regarding a woman's options for treatment of fibroid tumors

Menopause and Sexual Health our providers are specifically trained in menopause and sexual health, and are National Certified Menopause Practitioners (NCMP). We offer a variety

of services including non-hormonal and hormonal treatment of hot flashes, sleep disturbances and sexual pain associated with the menopause transition.

Nurse-midwifery care for women in their reproductive years including well-woman visits, pregnancy and birth

Sexual Dysfunction provides confidential evaluation and management of female sexual concerns

Pre-Menstrual Syndrome (PMS) addresses conditions and symptoms of PMS and provides individualized care

Procedures outpatient sterilization procedures and other minor procedures including hysteroscopy and endometrial ablation are performed in an office setting

Vulvar and Vaginal Diseases an integrated team provides care to women suffering from vaginal and vulvar problems
